

Abstract

A fire assembly that can be used for installing recessed light fixtures into various structures is provided. The fire assembly includes a recessed light fixture contained within a generally fire-resistant housing. The housing can enclose the recessed light fixture in such a manner that the resulting fire assembly has an integral structure. In some instances, a support structure can be utilized to attach the housing to the recessed light fixture. Furthermore, the housing can be a cube-shaped box have a variety of generally fire-resistant walls. These walls can be made from materials such as sheet rock or aluminum.
